Why Orlaco?

Welcome to the Orlaco product catalogue. We are personally committed to bringing you the best camera and monitor solutions possible. To help create safer and more secure workplaces around the world. Our professional team has spent over twenty-five years designing and manufacturing a variety of certified, reliable and complete camera display solutions that effectively eliminate the blind spots around vehicles, machinery and vessels. We are confident that the options offered in this catalogue will not only help you to improve the safety, security and efficiency of your fleet, but also to enhance the ergonomics and comfort for your operators. That is what Orlaco stands for. We invite you to share your ideas and experiences with us.

That's  
why!

Let us  
**improve**  
your every  
day job

Improved  
Safety and  
Efficiency

Enhanced  
Ergonomics  
and Comfort

Certified  
Quality

Camera monitoring systems can play an important role in maintaining safety conditions and efficiency onboard ships. Next to that, ship operators might find that the extra visual coverage helps them keep a better eye on the ship, its crew and its surroundings. An Orlaco camera monitoring system could help the CCTV operator detect possible safety issues in time and prevent any incidents. An improved view of the on-board working areas and the ship's surroundings could help ship operators be more efficient in their work. Orlaco cameras can give a real-time overview of crew working areas, process monitoring and any other type of surveillance. On-board camera systems could add value to the security, safety and efficiency of ship personnel and the equipment they use.

Efforts can be made to prevent accidents, but they still happen. Operating in confined areas with a lot of blind spots can cause damage to equipment and possible injuries to the crew. An Orlaco camera monitor system could provide the operator with an 'extra pair of eyes'. For instance, a good camera monitoring system is helpful when maneuvering, and during ship crane operations or dredging operations. This could help reduce unnecessary personal injuries and help to prevent Lost Time Incidents (LTI). Additionally, the use of cameras can contribute to the ergonomics and comfort of the operators. What's more, video images can be distributed over a network to aid multiple employees with real-time reviewing of any given situation. Effective decisions could be made based upon the visual live feedback from any remote location.

At Orlaco, quality is never taken lightly. We keep a clear and persistent focus on customer satisfaction. A focus that is maintained throughout the manufacturing process of our quality products, which are custom designed in various formats. We are able to uphold our level of quality by providing detailed servicing. To top it all off, we have secured the highest achievable automotive certification: TS16949. At Orlaco, we invest in continuous improvement in order to secure a long term, satisfied customer base. We believe that compatibility in products, systems, and operations is the key element to creating reliable partnerships. All our products are controlled and clearly documented to give our customers a zero-defect product with operation that works right, every time.

Why Orlaco

Why Orlaco

**Winch-view**

The winch camera provides the operator with a view of the winch and the tow cable.

**Deck-view**

The deck view camera provides the operator with a good view of the crew working on deck, machinery and stowed equipment.

**Engine room-view**

With a unmanned engine room the operator has no supervision of this area. By placing a camera in this room, optional with or without LED lights, the operator can easily detect oil spills or beginning of smoke development, before the detection system gives a warning.

**Tugboat**

When maneuvering the Tug, an Orlaco camera monitor supports the captain in this operation. By placing several Orlaco cameras at locations that need to be supervised, the captain has a clear overview on the monitor in the wheelhouse. Locations as the winch, towing cable and engine room can be monitored closely. This will benefit in efficient and safer operations.

Load-view HD

A Boom tip camera reduces the risk during crane operations. Installed in combination with the Orlaco Oil damped bracket, the crane operator is provided with the best possible HD view of the load and the area under the load.

Night vision observation-view

The thermal image camera with pan & tilt unit (PTTIC) is a night vision camera used for security reasons on open water. Without the need of a light source this camera will provide a optimal view and will warn the operator of any object that is approaching the vessel.

Engine room-view

Most of the time the engine room is unmanned and there is no visual of this area. With the help of a camera the operator can detect oil spills or smoke forming, before any of the detection systems gives a warning.

Crane overview HD

Heavy lifting and Special Transport vessel

A HD camera monitor system is the right solution for vessels where load obscures the vision of the operator. By positioning HD cameras at strategic positions the operator has an optimal supervision of the container load and deck areas.

As an added value a HD camera monitor system can also be used for detecting possible Piracy attacks. With a day time camera and a night time thermal camera, approaching vessels can be detected in time and the crew can take the necessary precautions.

Aft deck-view

The deck view camera provides the operator with a good view of the crew working on deck, machinery and stowed equipment.

## Marine sight solutions

### Deck-view

The deck view camera provides the operator with a good view of the crew working on deck, machinery and stowed equipment.

### Winch-view

The winch camera provides the operator with a HD view of the winch and the low cable.

### Bridge wing-view

The bridge wing camera provides the operator a view of the crew working on deck when reeling in the nets.

### Engine room-view

With a unmanned engine room the operator has no supervision of this area. By placing a camera in this room, optional with or without LED lights, the operator can easily detect oil spills or beginning of smoke development, before the detection system gives a warning.

### Fishing vessel

When the operation on a fishing vessel is in full progress the captain does not have a view of all the locations onboard of the vessel. Especially a good overview of the crew reeling in the nets is a must. With the use of an Orlaco camera monitor system the captain can concentrate on operating the vessel and will also have a good overview, creating a safer working environment.

Bridge wing FWD-view

With the bridge wing camera the operator can maneuver the ship into locks and on narrow waterways. The camera is also used to view the front Bolder and the crew working on deck.

Aft deck-view

Hatch crane-view

Unsafe situations can occur during operation of the hatch crane. The Hatch crane camera system will improve safety during operation of the crane. On both sides of the crane two Compact Cameras with an IR lamp will be installed. One camera for a good overview of the gangway, the other camera is aimed at the hook of the spreader. Day or night, the operator is always able to see if the gangway is clear and if the hook is properly locked.

FWD-view

The forward view camera is used to overlook the waterway and maneuver the ship into a Lock. This camera also brings the area in front of the bow in sight making it possible to observe smaller boats in time to prevent accidents.

Engine room-view

Most of the time the engine room is unmanned and there is no view of this area. With the help of a camera, optional with our without LED lights, the operator can detect Oil spills or smoke forming, before any of the detection systems gives a warning.

Inland shipping and Coaster ship

When positioning a vessel in front of a lock and maneuvering into the lock, a camera monitor system is of great help. With the installation of a zoom camera on the bridge wings and a fixed camera on the mast, the captain has a good overview of the situation. The fixed camera on the mast is also used to eliminate the blind spot in front of the vessel. He can overlook the waterway to see if any smaller vessels like pleasure boats are in front of the vessel. This ensures safe operation of the vessel.

Anchor-winchview

With the winch camera the operator can see if the cable is running properly onto the reel. It is also possible to detect any damages to the cable in time.

Deck ramp-view

This camera is used to view the loading and unloading of the ship. As an additional security precaution the deck ramp camera will give the operator a clear view of the ramp being properly closed or opened.

Night vision observation-view

The thermal image camera with pan & tilt unit (PTTIC) is a night vision camera used for security reasons on open water. Without the need of a light source this camera will generate a picture and will warn the operator of any object that is approaching the vessel.

Aft deck-view

The deck view camera provides the operator with a good view of the crew working on deck, machinery and stowed equipment. An IR lamp enhances the view in the dark.

Bridge wing-view

The Bridge wing camera is used by the operator for observation of the ships gangways and for maneuvering and mooring of the ship.

Auto deck-view

The deck view camera provides the operator with a good view of the parked trailers.

Ro-ro vessel

With a lot of activities happening during the loading and unloading of the vessel a camera monitor system will give the operator a better view of all the operations that are going on. Positioning deck view cameras on strategic positions will give the operator a good view of the load and deck areas and possible passenger quarters he cannot oversee from the wheelhouse. As a final safety precaution the Deck ramp camera will show the operator if the ramp has been properly opened or closed.

Engine room-view

With the help of a camera the operator can detect oil spills or smoke forming, before any of the detection systems gives a warning.

Aft deck-view

The deck view camera provides the operator with a good view of the crew working on deck, machinery and stowed materials.

Draghead / Bridge wing-view

A PTZ camera is used for a view of the Draghead position either on SB or PS of the vessel. With the possibility to maneuver the camera in a left/right and up/down position the whole area can be scanned. With the integrated zoom camera the operation can be viewed in full detail.

Hopper overflow-view

This camera is used to see the water draining through the overflow. With a vision on the overflow the operator can take immediate action if anything goes wrong during the operation.

Pump room-view

Most of the time the pump room is unmanned and there is no visual of this area. With the help of a camera the operator has a good view of the dredging pump.

Engine room-view

Most of the time the engine room is unmanned and there is no visual of this area. With the help of a camera the operator can detect Oil spills or smoke forming, before any of the detection systems gives a warning.

Dredging vessel

For any operation onboard a Dredging vessel an Orlaco camera monitor system is an added value. Either being used for a view of the draghead, pump room, engine room or the overflow, a camera system will give the operator an overview of all operations in one view. With the possibility of choosing between a fixed, zoom or pan & tilt zoom camera observation, the right type of camera can be selected for any of the processes.

18 Cable laying vessels

Deck-view

The deck view camera provides the operator with a good view of the crew working on deck, machinery and stowed equipment.

Loadview

A Boom tip camera reduces the risk during crane operations. Installed in combination with the Or-laco Oil damped bracket, the crane operator is provided with the best possible view of the load and the area under the load.

Deck-view

The deck view camera provides the operator with a good view of the crew working on deck, machinery and stowed equipment.

Engine room-view

Most of the time the engine room is unmanned and there is no visual of this area. With the help of a camera the operator can detect Oil spills or smoke forming, before any of the de-tection systems gives a warning.

Anchor-winchview

With the winch camera the operator can see if the cable is running properly onto the reel. It is also possible to detect any damages to the cable in time.

Reel-view

From his position the operator has no view of the cable running from the reel. With the reel camera he is able to observe the reel operation and can take immediate action if necessary.

Cable Laying vessel

For any operation onboard a cable laying vessel an Or-laco camera monitor system is an added value. Whether being used for a view of the turntable, anchor winches, engine room or deck areas where the crew is working, a camera system will give the operator an over-view of all operations in one view. With the possibility of choosing between a fixed, zoom or pan & tilt zoom camera observation; the right type of camera can be selected for any of the processes. Using an Or-laco camera monitor system will not only improve your operation but will also add to a safer working environment.

**Deck-view**

The deck view camera will give the operator a good view of the crew working on deck, machinery and stowed materials.

**Heli deck-view**

Helicopter departures and arrivals are one of the most riskfull activities on board a ship. With the installation of a Heli deck camera, these operations can be monitored day and night.

**Aft deck-view**

The deck view camera will give the operator a good view of the crew working on deck, machinery and stowed materials.

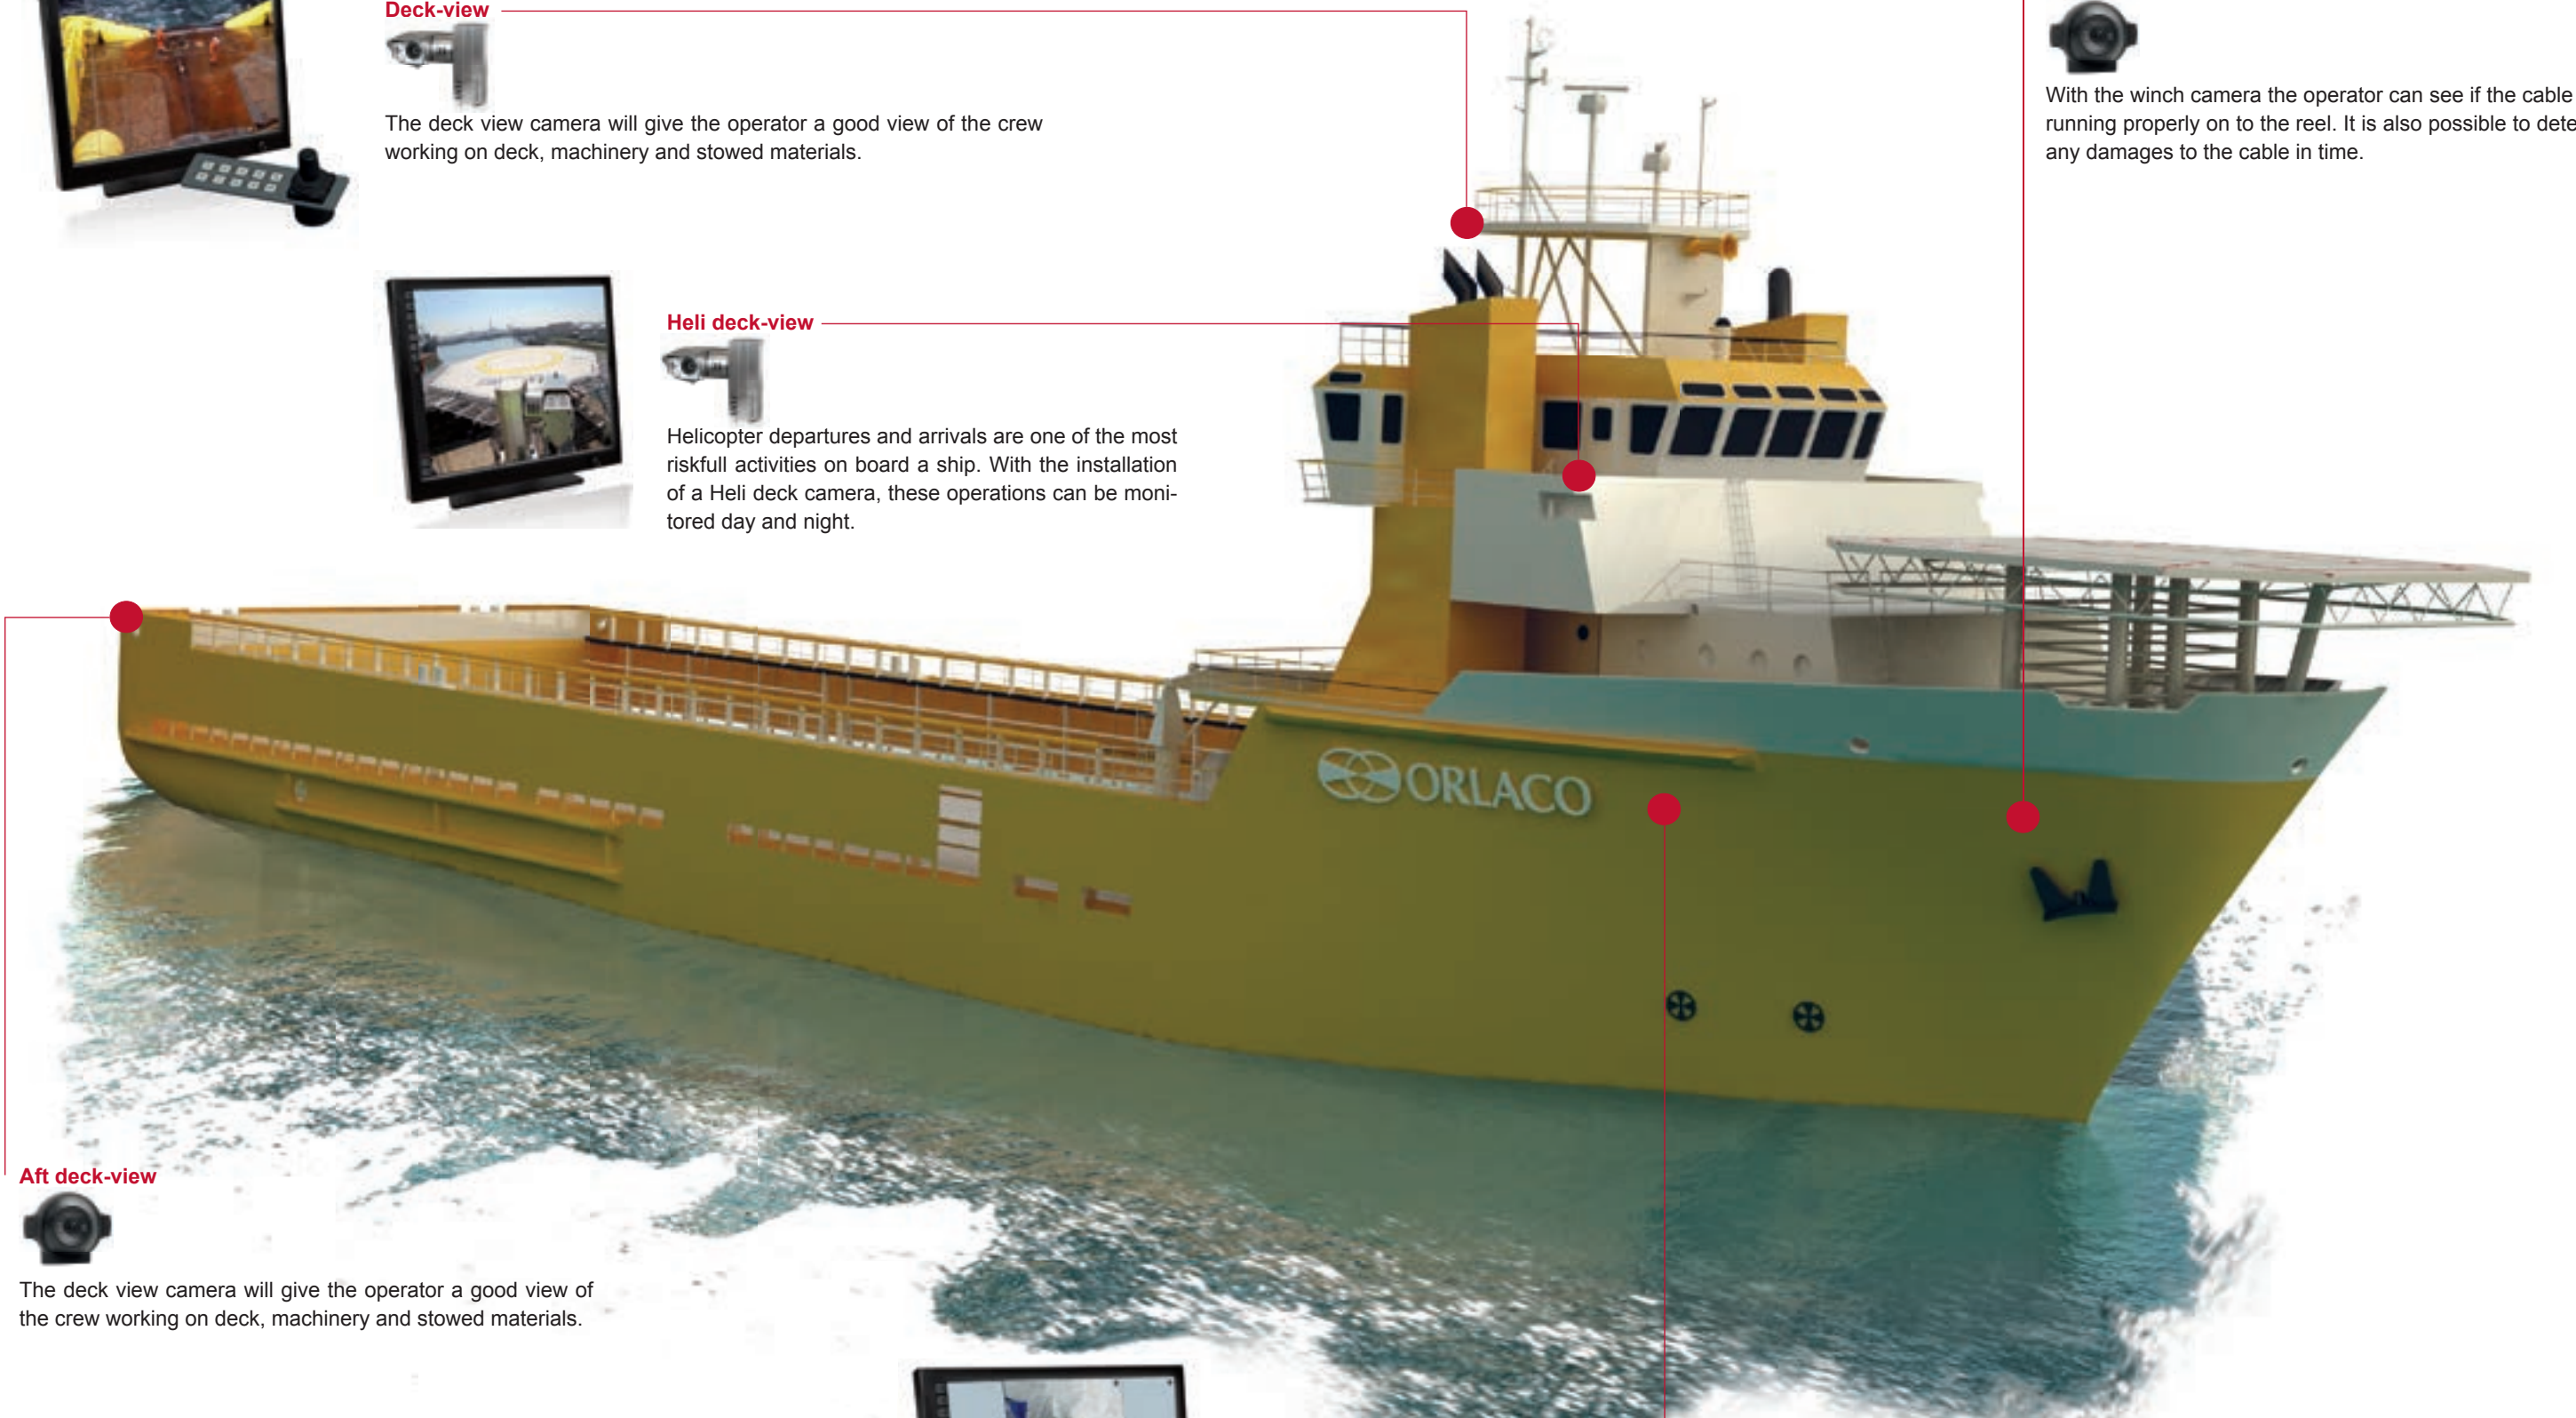

**Engine room-view**

Most of the time the engine room is unmanned and there is no visual of this area. With the help of a camera the operator can detect Oil spills or smoke development , before any of the detection systems gives a warning.

**Anchor-winchview**

With the winch camera the operator can see if the cable is running properly on to the reel. It is also possible to detect any damages to the cable in time.

**Platform Supply Vessel**

For any operation on board a Supply vessel an Orlaco camera monitor system is an added value. Whether being used for a view of the engine, deck areas or Heli deck, a camera system will give the operator an overview of all operations in one view. With the possibility of choosing between a fixed, zoom or pan & tilt zoom camera observation; the right type of camera can be selected for any of the processes.

Mooring winchview

With the installation of an Ex compact camera the operator can remotely view all the winch operations.

Bridge wing-view

PTZ Ex camera for eliminating any blind spots alongside the ship or viewing the immediate surrounding of the ship.

General process-view

With the installation of a single or multiple Ex compact cameras a direct overview of the process area is secured.

Loadview

The Ex zoom camera fitted on the boom is looking vertically downwards onto the top of the hook providing the crane operator with a clear view of the working area and load he is maneuvering.

Observation-view

PTZ Ex camera for overview of the area near or away from the ship.

• Operations

For any operation onboard an Offshore vessel an Orlaco camera display system is an added value. Whether being used for the observation of the manifold area, mooring winch or engine room operations, a camera system will give the cctv operator an overview of all operations in one glance. By selecting a camera in any of the operating areas, an operator can have a detailed look at the operating process.

• Safety and Security

Safety onboard of any vessel is of great importance. Either for crew, equipment or the vessel itself safety at all times should be guaranteed. An Orlaco camera system can be of assistance in maintaining the safety onboard the vessel. By placing cameras in strategic positions the cctv operator has a general overview of all the areas where a possible safety incident could occur. With the decreasing amount of the number of crew members onboard the vessels the camera "eyes" are of an added value.

Helideck-view

Helicopter arrivals and departures are one of the most hazardous activities on board an offshore rig. With the installation of a Heli deck camera these activities can be monitored and recorded day and night.

General process-view

With the installation of a single or multiple Ex compact cameras a clear overview of the process area is secured.

Loadview

A Boom Tip crane camera reduces the risk during crane operations. Installed in combination with the Orlaco oil damped bracket, the crane operator is provided with the best possible view of the load he is manoeuvring and the areas under the load.

• Operations

For any operation onboard of a rig an Orlaco camera display system is an added value. Either being used for the general, drilling or crane loading and offloading operations, a camera system will give the operator an overview of all his operations in one glance. The use of a camera system will increase operator profitability because of the reduction of operators downtime.

• Safety and Security

The number of crew members working on an offshore rig is decreasing. This is a recent trend in the offshore industry since a few years. During the operation of the rig, a lot of activities are going on. A good alternative to display these activities, as well as the many blind spots on the rig, is an Orlaco camera display system. Activities can be monitored and recorded. These images can be used to train the crew to avoid future incidents from happening.

### Set HD IP

Orlaco's HD-IP cameras support the TCP/IP protocol. This enables streaming of high resolution video images via digital networks. You have the flexibility to connect the HD IP cameras to any location in your network and PC-monitors. Through a single network cable you have access to all camera images. With the Orlaco Smartview software, you have a complete view on operations.

Set **SmartView**

The Orlaco Smartview solution is an IP based CCTV system based on the Orlaco Smartview software for the connection of multiple control and camera stations. By combining the Smartview camera interfaces, a system design based on a TCP/IP network can be made.

The qualifications of our FAMOS Compact Cameras

- Next generation CMOS sensor
  - Light sensitivity 0.05 lux
  - Integrated *Safety ticker* to show that camera is running and active
  - Optimized impact- and vibration-resistance
  - Chemically hardened lens
- Automotive molding-filled housing, watertight IP69K according to DIN 40050-9
  - Improved EMC-standards
  - Operating temperature between -40°C to +85°C
  - Heated lens glass, therefore no problems with condensation or frost
- Fixed lens
  - IP68 dust- and waterproof according to IEC 60529
  - The camera has a 0,5m cable including a waterproof molded 4p male connector

80°	0171610	0171630
118°	0171600	0171620
• UV-transparent front cover		

The qualifications of our Zoom Cameras

- Operating temperature between -40°C to +85°C
  - Built-in brightness function to ensure better visibility on dark areas
  - 40x optical zoom, 1,6° to 48° horizontal opening angle
- Built-in night vision function ( 0 lux mode)
  - Nitrogen-filled housing, 100% watertight (IP 69K)
- Heated lens glass, therefore no problems with condensation or frost
  - Shock and vibration resistant

AF-Zoom Cameras

- Including 6m multi cable fitted with 7p connector (female)
- Power supply 12V - 24V/DC when cable is <50m
- Power supply 18V - 24V/DC when cable is >50m

- 0103513 AF-Zoom Camera Aluminium (HW)
- 0103532 AF-Zoom Camera Aluminium
- 0113532 AF-Zoom Camera Aluminium RS 485
- 0103482 AF-Zoom Camera SSSt 316
- 0113482 AF-Zoom Camera SSSt 316 RS 485

Infrared illuminator

For Compact or AF-Zoom Cameras.

0507300 IR-CIV870 Lamp

- 870nm IR light
- Max. 15W
- IP67
- Maximum range 75m

Thermal Imaging Camera

- Thermal Imager Uncooled VOx microbolometer
- Including 6m multi cable fitted with 7p connector (female)
- 25° lens (up to 450m detection)
- Nitrogen-filled housing, 100% waterproof IP69
- Operating temperature between -40°C to +80°C
- 12-30V/DC max 8W
- 2x and 4x zoom

0103732 TIC Aluminium 9Hz

0103742 TIC SSSt 316 9Hz

The qualifications of our Pan & Tilt Zoom Cameras (PTZ)

- Operating temperature between -40°C to +85°C
  - Built-in brightness function to ensure better visibility on dark areas
  - 40x optical zoom, 1,6° to 48° horizontal opening angle
  - Built-in night vision function ( 0 lux mode)
- Nitrogen-filled camera housing, 100% watertight (IP 69K)
  - Heated lens glass, therefore no problems with condensation or frost
  - Shock and vibration resistant
  - Dimensions: HxWxD 284x307x141mm
  - Including 5m cable with 7p connector
  - 6 presets for camera positions
- Pan angle 360° (180° to left, 180° to the right)
  - tilt angle 180° (90° up, 90° down)
  - Pan & tilt speed 12,5°/sec
  - Power supply 18V to 30V/DC

- Pan & Tilt Zoom Cameras (PTZ)**
- 0506953 PTZ Camera Aluminium
  - 0516952 PTZ Camera Aluminium RS 485
    - Aluminium housing
  - 0506912 PTZ Camera SSt 316
  - 0516912 PTZ Camera SSt 316 RS 485
    - Stainless steel housing

- Pan & Tilt Thermal Image Camera (PTTIC)**
- 0506972 PTTIC Aluminium 9Hz
    - Aluminium housing
  - 0506982 PTTIC SSt 316 9Hz
    - Stainless steel housing

- Washer Wiper**
- Reservoir 8L with 6m rubber hose
  - Wall mount reservoir housing h647 x w436 x d250mm
  - Electrical pump activated
  - Controlled by Orlaco SmartView or VCU System (not included)
- 0405810 Washer Wiper Installation PTZ Camera
- Including mounting plate, nozzle and wiper stainless steel 316
  - Only in combination with the stainless steel PTZ (0506910)

The additional qualifications of our HD-IP zoom cameras

- HD Image CMOS Sensor
  - Chemically hardened lens
  - 30x zoom
  - Resolution: 1920 x 720 at 60 fps
- Video streaming over TCIP/IP
  - Operating temperature between -40°C and +60°C
  - Input Voltage 18...30V/DC
- Including 5m ethernet cable
  - 32 presets for camera positions
  - Watertight IP69K

- AF Zoom HD-IP Cameras**
- 0103810 AF-Zoom HD-IP Camera Aluminium
  - 0103820 AF-Zoom HD-IP Camera SSt
  - 0506810 PTZ HD-IP Camera Aluminium
  - 0506820 PTZ HD-IP Camera SSt

The advantages of Orlaco cables

- All cables are specially developed by Orlaco engineering for the applications mentioned in this catalogue
- Special lengths or versions are available upon request
  - All cables have EMC screening for optimum performance of the equipment in crowded areas with
- electromagnetic noise
  - Resistant to oil and petrol
  - Watertight cable connectors
  - Operating temperature -40°C to +85°C

Cable per metre (without connectors)

Any required connectors can be ordered separately. (page 36)

- 1220170 Multi cable 1x coax, 5x wires
  - Halogen free
- 1220280 Multi cable armored 1x coax, 5x wires
- 1220250 Multi cable 1x coax, 10x wires PUR
- 1221330 Multi cable 1x coax, 6x wires

Multi cable standard (type 1220170)

This standard cable can be used if no special requirements like mechanical protection of the cable is needed. Available with 4p and 7p molded connectors in various lengths.

- Including 4p molded connector & open wired:**
- 0302150 20m

- Including 7p female connector (1311201) & open wired:**
- 0302160 20m

Connectors

Recommended for multi cable (1220170 ).

- 1310841 Connector 4p female Gold
- 1312001 Connector 4p male Gold
- 1311201 Connector 7p female Gold
- 1322401 Connector 7p male Gold

Recommended for armored cable (1220280).

- 1310850 Connector 4p female PG9 Gold
- 1312050 Connector 4p male PG9 Gold
- 1311250 Connector 7p female PG9 Gold
- 1322450 Connector 7p male PG9 Gold

- 0357011 Bulkhead connector 4p
  - Suitable for lead-through on bodywork

- 0357050 Bulkhead connector 7p
  - Suitable for through the wall applications

The possibilities offered by Orlaco LED monitors

- Automotive 7inch TFT liquid crystal display module, LED backlight
- Operating temperature between -40°C to +85°C
- Impact and vibration resistance meet the stringent requirements
- Power protected against:
  - Induction voltages
  - Load dumps
- Over- and undervoltage
- Mirror image setting
- High resolution pixel WVGA 800xRGBx480
- Brightness automatically adjusts to the ambient light
- Option of a marker line per camera on the screen for the optimum determination of distance
- Integrated sun visor
- IP67 according to IEC 60529
- Full On-Screen-Display (OSD) in 12 languages
- Watertight molded connectors

Monitors

0208672 Monitor 7” RLED

- 4m multi cable (power) open wired, 4m multi cable (video) including 4p female connector
- Input Voltage 12...60V/DC +/-10%
- User-adjustable 132mm mounting bracket

0208632 Monitor 7” RLED Serial

- For serial connection (Zoom- , PTZ- or TIC cameras)
- 6m multi cable (power) open wired, 6m multi cable (video) including 7p female connector
- Input Voltage 18...30V/DC +/-10%
- User-adjustable 132mm mounting bracket

0411000 Monitor 12”

- 4m multi cable (power) open wired, 4m multi cable (video) including 4p female connector
- Input Voltage 12...30V/DC +/-10%
- User-adjustable 190mm mounting bracket

0411130 Monitor 12” Serial

- For serial connection (Zoom- , PTZ- or TIC cameras)
- 6m multi cable (power) open wired, 6m multi cable (video) including 7p female connector
- Input Voltage 18...30V/DC +/-10%
- User-adjustable 190mm mounting bracket

2291230 Sunmask 12” Monitor Horizontal  
ABS Sunmask specially designed for the 12” RLED Monitor.

Marine Line monitors

- Anti-reflection protection glass plate, IP65 sealing (front)
- Input composite (BNC),VGA, DVI-D,S-video
- 0-100% dimming with IP67 twistknob
- 110 to 230V/AC

Panelmount TFT Monitor

- 0200008 Monitor 10.4" Picture diagonal
- 0200009 Monitor 15.0" Picture diagonal
- 0200010 Monitor 17.0" Picture diagonal
- 0200011 Monitor 19.0" Picture diagonal
- 0200012 Monitor 24.0" Picture diagonal

Desktop TFT Monitor

- 0200007 Monitor 10.4" Picture diagonal
- 0200003 Monitor 15.0" Picture diagonal
- 0200004 Monitor 17.0" Picture diagonal
- 0200005 Monitor 19.0" Picture diagonal
- 0200006 Monitor 24.0" Picture diagonal

1000864 Desktop Stand

- for 10.4" to 19" monitors

1000865 Heavy Duty Desktop Monitor Stand

- for 15" to 24" monitors

1000868 RAM Bracket Vesa mount

- for DT series

Orlaco SmartView

0060310 Licence Smartview software

- Viewing of high quality video for multiple cameras in multiple configurations
- Support H.264 digital video codec
- Low latency and a high quality image
- Multiple display settings (full, split, quadviews, 8 and 16 cams on 1 screen)
- Individual camera presets and master presets for controlling multiple PTZ simultaneously
- Sequential camera switcher
- Video loss detection
- Motion detection
- Individual lock functions PTZ
- Supplied on USB memory stick

**Options:** Capacitive or resistive touchscreen (RS232 & USB), Optical bonding, Transflective, 9-34V/DC

Multiview split

- Stainless steel housing
- Serial Orlaco Monitor needed

0405100 MultiView box II

- 4 camera inputs (4x Compact Camera)
- MV1300 system

0405110 MultiView box II

- 4 camera inputs (3x Compact Camera 1x AF-Zoom Camera)
- MV1440 system

0405200 MultiView box II dual mode

- Pre-programmed splitscreen
- Including adapter plug 4p male - 7p female (0357500)

Preset view options for channel 1-4:

Default channel 5:

Quadbox

QB1404 Quadbox

- 1 video - display output (BNC)
- Control connection
- Stainless Steel IP66 housing
- Central power supply 110-230 V/AC
- 4 camera inputs
- MV1400 system

Switchbox

- 4 keyboard / video-display outputs (BNC)
- Stainless Steel housing IP66
- Central power supply 110-230 V/AC
- Dimensions 300mm (d) x 400mm (w) x 160mm (h)

SB1808 Switchbox

- 8 compact camera inputs

SB1812 Switchbox

- 12 compact camera inputs

SB1816 Switchbox

- 16 Compact camera inputs

Control Unit panel mount (for Switchbox)

- CAT5 cable connection

2231630 Control panel mount

- Control of max 16 cameras
- SB1801 / SB1812 / SB1816 system

Control Unit panel mount (for Quadbox)

- CAT5 cable connection

2230680 Control panel mount

- Control of max 4 cameras.
- MV1400 system

USB Keyboard

Built-in keyboard for activating of max 10 cameras controlled by SmartView.

2231510 USB Keyboard SmartView

- Dimensions: 170x53mm, mounting depth 35mm
- Smartview system

Control Serial

For activating of the Pan & Tilt / AF-Zoom / TIC camera.

0502610 Handheld control AF (serial)

- Zoom function
- Including 5m power supply cable

0502620 Control panel mount

Built-in keyboard for activating of the Pan & Tilt / AF-Zoom / TIC camera.

- Joystick (0506500) is not included
- Dimensions: 140x116x80mm
- OS1200 / AV1600 system

0506500 Joystick

- Built-in
- Operating temperature between -30°C to +75°C
- IP40
- Telemanique

### Spectrum Scanner wireless video transmitter & receiver

- Including powercable and two adjustable brackets for transmitter and receiver
- 8 video channels
- Full On Screen Display (OSD) functionality for system settings
- Please contact your dealer for further advice

#### 0004061 RoundMax 150

- Omnidirectional antenna with horizontal orientation
- Maximum range 150m (dependent on surroundings)

#### 0004091 LineMax 300

- Directional antenna with vertical orientation
- Maximum range 300m (dependent on surroundings)

### Pan & Tilt units

- IP 68 watertight

#### 0507061 Pan & Tilt unit 6kg 24V

- Left/right reach 360° speed: 30° sec.
- Reach up 30° down 90° speed: 10° sec.

#### 0507050 Pan & Tilt unit 12kg 240V

- Left/right reach 350° speed: 6° sec.
- Reach up 25° down 90° speed: 3° sec.

#### 0507040 Pan & Tilt unit 12kg 24V

- Left/right reach 360° speed: 32° sec.
- Reach up 25° down 90° speed: 12° sec.

#### 0507100 Fastening plate

For quick mounting of camera on Pan & Tilt unit.

### Mounting parts

Cover specially designed for the Compact Camera.

#### 0402320 Protective cover

- Stainless steel housing

Specially designed for the Compact Camera. The nozzle allows high pressure cleaning of the camera lens.

#### 0402310 Aerodynamic cover + nozzle

- Hose and water tank are not included
- Stainless steel

Ceiling mount for Compact Camera.

#### 0402450 Camera Housing Dome

- Aluminium housing
- Including mounting hardware
- Compact Camera is not included

### Switchers

Input and power supply for three cameras and in combination with a Y-split cable: four cameras.

- Cameras can be switched over automatically or manually

#### 0404040 Switcher UNI

- Waterproof IP54 according to IEC 60529
- 4p output for monitor

#### 0404061 Switcher Serial

- Waterproof IP67 according to IEC 60529
- 7p output for monitor
- Only in combination with a Serial monitor
- Possibility to connect 1 serial Orlaco camera (AF Zoom)

### Power supply

Power supply for the Compact Camera.

#### 0504031 AC/DC unit

- Power input 110-230V/AC
- Power output 12V/DC
- Dimensions 94mm(d) x 130mm(w) x 57mm(h)

### Interface Control panel

To control a serial zoom camera.

#### 0502920 Interface Controlpanel Serial 2x7p

- Including 4m power supply cable
- Can control each type of monitor

The qualifications of our Ex Compact Cameras

- CCD sensor
  - Nitrogen-filled camera housing, 100% watertight (IP 69K)
- Shock and vibration resistant for usage on offshore platform
  - Chemically hardened glass
- There is an aperture angle for every vision solution

Cameras CCC Ex

- Light sensitivity 1.5 lux
- T4: -40°C to 75°C, T5: -40°C to 50°C, T6: -40°C to 35°C
- Including a 5m multi cable

### Certifications

All Orlaco products are manufactured according to the latest Quality Management System Standards:

**IATF 16949 : 2016**  
**ISO 9001 : 2015**

Additionally, all Orlaco products are manufactured according to the latest *Environmental Management System Standard*:

**ISO 14001 : 2004**

### Type-Approval Certifications

**Regulations 10 and 46** are used to determine the Type-Approval for **EMC** and **Indirect Vision** (Mirror Directive). **R46** describes mirror specifications for truck compliancy. Orlaco Frontview systems meet all these requirements. **R10** describes the **EMC** behaviour of the Orlaco Camera and Monitor systems.

The Orlaco camera and monitors for vessels are **RMRS** (Russian Maritime Register of Shipping) accredited.

**Ship Security Surveillance TV System**  
**type "ORLACO CCTV System" 04410000**

### Compliance

Our Camera and Monitor systems are produced entirely in line with the **CE-marking** and the most recent applicable directives and product standards (e.g. **EMC**, **FCC**, **Machinery**, **R&TTE**). Orlaco products are compliant with **RoHS** and **REACH**.

All Orlaco materials are compliant to **Green Passport** requirements according IMO resolution MEPC.197(62) as adopted on July 15th 2011 (Maritime sector: International Maritime Organization concerning the functions of the Marine Environment Protection Committee).

### Dekra Certificate Ex

European examination for Explosion proof equipment. All Orlaco Ex products comply with the Essential Health and Safety Requirements for use in potentially explosive atmospheres, according to directive 2014/34/EU.
